

Code	AMI- NPST001
Project Name:	A Standardized Integrated Methodology for Design of Manufactured Components
Objectives:	The main goals of this project is to introduce a CAD-based design methodology that has the ability to integrate CAD, CAIP, and CAFD to automate the product life cycle based on production rules and to standardize the proposed methodology to give it the ability to be used by various CAD systems.
Project Period	30 Months
Start Date	November 2011
Budget	SR.1,439,000
Status	Completed / Final report is in progress
Project Outcome	Final Report
Principal Investigator	Prof Abdulrahman Al-Ahmari
